RE: Proposed interview summary revision

In re Application of: Altmann, et al.
Title: NPC1L1 (NPC3) AND METHODS OF USE THEREOF
Group Art Unit: 1653
Attorney Docket No.: JB01603K3US
US Serial No.: 10/736,769
Filed: 12/16/2003

Dear Examiner Lin:

As discussed over the telephone, I would like to propose the following revision to the interview summary mailed July 14, 2006 in connection with this case. As I mentioned, the reason I am making this proposal is that the Summary indicated that I discussed certain matters, during the interview, whereas I do not recall doing so. In the "Continuation of Substance of Interview" section, please delete the following text "for detecting or diagnosing cholesterol homeostasis or biosynthesis of cholesterol-associated lipoproteins or in vivo cellular regulation of cellular cholesterol level" and replace it with "useful, for example, for detecting the claimed polypeptide or regulation of intestinal cholesterol absorption and cholesterol levels"

Please feel free to contact me with any questions or concerns.
